

I'm going to kill

Here's the thing

was pregnant & fell off

You should ask her to make a list of all her symptoms, and compare it w/ the list on the overhead

Can we ask her "Are you pregnant?"

~~It's probably not a good idea~~

Maybe she was pregnant & she had an abortion or with which we want to determine which

Her clumsy self probably tripped and fell on the way to the clinic and ~~that~~ caused an abortion.

she would never think of pregnancy & abortion

I do anything ... I can

Whenever you kiss a guy you probably think you're pregnant, she's scheduled in a program which she's still in denial. Not that bad, for me for her hell yeah.
